

GONZALO BARRACOSA RITA

ENGINEERING OFFICE MANAGER · MECHANICAL DESIGN LEAD

WORK EXPERIENCE

ThermEx International NV | Antwerp, Belgium | June 2025 – Present

Senior Mechanical Design Engineer.

Own the mechanical design workflow for bolt-on steam heating systems — planning deliverables and setting the Inventor/Vault standards for the team.

Run an iLogic configurator that cut per-unit design time ~60% (8 h → 3 h) and auto-generates drawings and BOMs, raising office throughput.

Coordinate with a major Oil & Gas EPC (Samsung / Aramco Fadhili), removing 12 field clashes on sulphur-storage tanks.

Preserve ASME/PED certification with non-intrusive clamping (no re-stamp).

WTEenergy | Barcelona, Spain | April 2023 - June 2025

Senior Mechanical Design Engineer.

Led detailed design of gasifiers, syngas coolers and pressure vessels (ASME VIII / EN 13445 / PED) for Waste-to-Energy plants, coordinating a multidiscipline package to deliver 30+ IFC/AFC fabrication packages on schedule.

Managed supplier compliance (WPS/PQR) and manufacturing follow-up.

Ran on-site coordination in Lyss (CH) and Monjos (FR), achieving zero-clash installation of critical APT Cyclone-to-Thermal Oxidizer tie-ins.

Drove FEA & Autodesk CFD optimization, reducing structural weight ~15%.

Technip | Barcelona, Spain | October 2022 - April 2023

Rotating Equipment and Package Engineer

Requisition lead for an Oil & Gas rotating-equipment package: owned the Technical Bid Tabulation (TBT) and vendor selection across 8 vendors.

Coordinated instrumentation, electrical, civil and piping interfaces to hold the package schedule.

Approved Vendor Data (VDR) and led P&ID review.

SECCO S.A. | Rosario, Argentina | June 2016 - October 2022
Senior Mechanical Design Engineer.

Led procurement support and manufacturing risk management for recurring process equipment.

Standardized designs with iLogic templates and Vault reuse, cutting drawing time ~50% and lifting office throughput.

Engineered ASME-code pressure vessels and piping systems as advanced SAP ERP / Vault PDM user.

EDUCATION

Postgraduate Level: National University of Rosario

Master's in Business Management Engineering | March 2019 - 2023

Master's in Business Management Engineering

Faculty of Exact Sciences, Engineering, and Surveying - National University of Rosario, Rosario

Duration: 3 years.

University Level: National Technological University

Mechanical Engineering | March 2009 - November 2016

Graduated with a degree in Mechanical Engineering.

Faculty of National Technological University, Rosario.

Mechanical engineer (10+ yrs) stepping from senior design into engineering-office leadership. I run design workflows end-to-end — planning deliverables, standardizing CAD workflows (Inventor, iLogic, Vault), coordinating multidiscipline interfaces and suppliers, and keeping fabrication packages (IFC/AFC) on schedule and to code (ASME VIII, EN 13445, PED). Proven at turning ad-hoc design into repeatable, automated processes that raise office throughput.

CORE EXPERTISE.

Engineering / Design Office Leadership
Team & Deliverable Coordination · Workload Planning
Design Standards · CAD Automation (Inventor, iLogic, API)
Vault PDM · SAP ERP · Automated Drawings & BOM
Pressure Vessels & Static Equipment (ASME / PED)
EN 13445 · API 650 · Gasification & Waste-to-Energy
Rotating Equipment · Heat Exchangers · Piping
Technical Bid Evaluation (TBT) · Vendor Management
Field Installation Supervision (CH / FR)
